

Nursing

Associate of Applied Science

Entry wage: \$43,964* Median wage: \$58,173* Job placement rate: 94%**

A day in the life

Many nurses work shifts in hospitals, but nurses also work in schools, medical offices and other settings. In many cases, expect to be on your feet a lot and to work at a quick pace. Nursing involves hands-on work. You will likely see blood and body fluids.

Three reasons to consider this program.

1. You make a difference in people's lives.
2. You learn a lot about how the human body works.
3. Starting salaries tend to be good, and jobs are in demand.

Before you sign up, make sure you understand...

1. You must love biology. Your interest in biology must be as strong as your desire to help people.
2. You are on your feet a lot as a nurse. It's a physical job.
3. You may deal with trauma. Also, you will touch people. Think about how comfortable you are with physical contact with patients.
